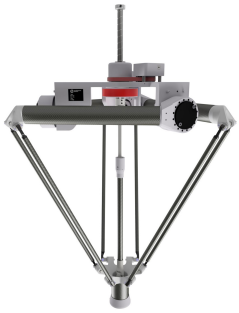
DELTA RLZ4-1050-6kg

Article number: A_01002-160-FO

Lubricant variant: Food-grade lubricants (FO)



Description:

This type of robot is based on the principle of parallel kinematics. All drives are mounted in a fixed position on the robot head. Motor cables are not moved. The robot has three (3) translational and one (1) rotational degree(s) of freedom. **Technical note** This specialized robotic design significantly increases the available working height. However, please note that, especially at high performance levels, more advanced control requirements and expertise are necessary. Consult your control systems partner. **Scope of delivery**
Robot mechanics incl. gearbox, Servo motor adapter, Threaded protection caps , Transport and packing instructions
